

GrainBAG Recycling

waste no longer means landfill

Integrated Recycling will process your used grain bags and turn them into a range of timber substitute products including fences, outdoor furniture and decking.

To recycle the grainbags after use:

- Please empty and clean the bag
- Fold inwards and then fold over and over into a square or cut first with a knife into manageable sizes before folding
- Please keep dry (Wet bags and leftover grain are a bad combination)

Please drop off bags at 316 Etiwanda Ave, Mildura VIC or contact us on 03 5023 0533 or customer_service@integratedrecycling.com.au
