HANG ON...for the safer and more versatile IR Rope Ladder

DURABLE, FLEXIBLE, SAFE & SPLINTER PROOF!

Integrated Recycling, leaders in recycled engineered endurance products, are proud to announce the arrival of the new IR Rope Ladder.

“IR ROPE LADDER”

Manufactured with all the benefits that IR's products carry our Rope Ladders provide a safe, flexible and durable alternative to either a traditional rigid ladder or timber rope ladder. IR's Rope Ladders are made from our patented recycled plastic composite mix and are constructed to endure in a variety of challenging environments from children's playgrounds to agricultural dams or commercial applications.

Features

- Manufactured with nylon rope, irrigation pipe and nylon plastic
- Can be made to order in any length
- Available in Charcoal, Earth Brown and Enviro Green.

Benefits

- Resist breakage and do not splinter
- Lightweight, easily transportable
- Minimal storage required
- Easy to handle
- Floats on top of surface and easily visible
- Unaffected by extreme climates
- Rot resistant and have very low water absorption
- Non-leaching of contaminants beyond minimal detectable levels
- Suitable for sensitive marine environments
- Resistant to UV damage
- Immune to pests such as white ants
- Manufactured to OH&S standards

Applications include

- Children's forts, cubbies and playgrounds
- Agricultural or marine environments such as dams, tanks etc.
- Anywhere a rigid ladder is not suitable
- Obstacle training courses
- Residential or commercial applications
- Marine or emergency rescue
