

# GRAPE COVER **REUSE** PROGRAM

Our commitment to sustainability impacts three areas - our stakeholders, society and the environment

## An offer too good to refuse!

We continue to invest in groundbreaking pursuits and to develop high performing materials which maximise the repurposing of Australian waste plastics and minimises waste sent to landfill.

Under the new grape cover reuse program, we are linking the collection and reuse of grape covers by Integrated Recycling (IR) at Mildura with the sale of new vine covers from Integrated Packaging (IP). From June 2025 a collection and processing fee will be charged by IR (calculated at \$0.50/kg of grape covers collected) to help build its capacity and capability under the program. If new grape covers are purchased from IP, the collection and processing fee will be **FULLY REBATABLE**.

The benefits of taking a holistic view of sustainability with Integrated Recycling & Integrated Packaging are:

- Engaging and supporting communities where growers operate
- Traceability of growers circular economy initiatives
- Participating in IP's development of grape covers with recycled grape covers content
- IR's continued use of grape covers to make its innovative range of recycled plastic products used Australia wide
- Supporting a local solution for a national problem

# YOUR OLD GRAPE COVERS HAVE A FUTURE

Integrated Recycling's Envire product range is made from Polytensilate (85% waste plastics)

## Envire

### Repurposed grape covers

This Tasman Bench is situated on the banks of the Murray River and is made from Polytenisilate which key ingredient is repurposed grape covers.

## Envire

### Outdoor Furniture

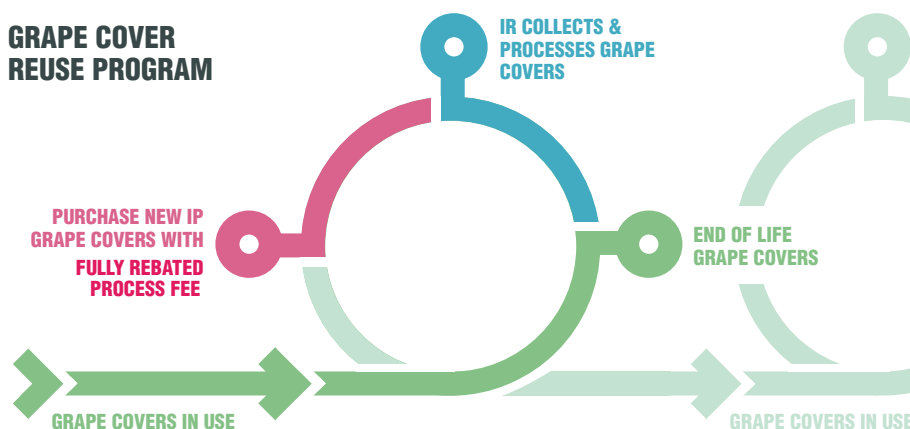

Built tough to thrive in Australia's extreme climates, the Envire range of outdoor furniture has the elegance of classical design and is perfect for parkland, reserves and commercial settings.

## Envire

### Gol Gol boat mooring area

The Gol Gol boat mooring area and canoe launcher project was developed to replaced the dilapidated timber structures with the more durable Polytenisilate.

### GRAPE COVER REUSE PROGRAM

RECYCLING  
AUSTRALIAN PLASTIC

Last year we processed **several hundred tonnes** of waste plastics in the Mallee and Sunraysia districts.

*Collections are subject to Integrated Recycling terms and conditions. Only PE covers will be accepted but not restricted to Integrated Packaging branded products. Poly woven covers are excluded from this program.*

*Envire and Polytenisilate are registered trademarks of Pro-Pac Group Pty Ltd trading as Integrated Recycling.*
